Electricity Demand in June 2013 (Bulletin)

Demand Overview (Total Sales of 10 Power Companies)

- Electricity demand in June 2013, measured in terms of the total electricity sales of the ten power companies, was down year on year, decreasing by 0.3% to 63.9 billion kWh.

- Outside the liberalized segment, lighting demand declined by 1.3%, due principally to a shorter meter-reading period compared with a year ago in spite of increased cooling demands caused by generally higher temperatures in June than the previous year.

Commercial demand in the liberalized segment rose by 2.1% due mainly to increased cooling demands caused by generally higher temperatures in June than the previous year.

(Reference)

Large industrial demand dropped year on year for the thirteenth consecutive month, decreasing by 1.2%.

This was mainly due to a year-on-year decrease in major industries except for textiles and chemicals.
